Requirememnts & Training
- Photo-Competition.software

Language

- Working language is English – se we need your information in English
- However – we can set up the interface for Photographer in your language, if you translate a "language file" we may provide

Requirements/Information needed to setup software:

- Logo, PNG against transparent background

- Stripe account

- Organization name (for the site)

- Categories (more can be added later)

- Rules for competition

- Rules for ranging winners per category and competition

- Templates for Medals & Possible Diplomas etc.

- Templates for Social Media / Presentation Slides for Medals, Diplomas etc.

Contact/Roles needed to be defined

- Organisation WhatsApp group (for easy group communication)

- Main Contact person (name, email)

- A head judge (name, email)

- "Office" persons to have access to Admin section of software

Information needed for each competition

- Competition name

- Which categories in specific edition of competition

- Online and/or in person judging on print/screens"

- Dates for submission, from/to

- Is validation done? When?

- Judging period incl possible verifications of scores

- Is Challenges to be used in an online competition?

- Possible Image label for prints?

- Cost per photo or competition or?

Training/brief for Office, Staff, Photographer and Judge Roles, including the position as Head Judge

- We will take you through a Test Competition where you will be involved in the different Roles, before starting an "actual" competition
  - all participant tries the "Photographer Role"
  - Other roles will try/see their own roles "in action" before we go "live"

- This may seem like "a lot", but our experience say we here catch a lot of questions before we involve actual participating Photographers
